SUMMARY

Full Stack Engineer with 3 years of experience developing scalable web applications using Java Spring Boot and microservices architecture. Experienced across the full development lifecycle from design and implementation to testing and deployment.

EXPERIENCE

Fullstack engineer — Faddom   Dec 2024 - Oct 2025

- Utilized Kafka with Spring Kafka in Java Spring Boot applications for asynchronous inter-service communication in microservices architecture, improving system responsiveness and reducing microservice load.
- Containerized microservices with Docker for consistent deployment across environments.
- Optimized PostgreSQL queries, reducing API response time.
- Improved application performance by reducing unnecessary re-renders through Angular optimization techniques.

Fullstack engineer — Bright Data   Dec 2022 - Dec 2024

- Developed IP rotation microservice using Java, Kafka, and Spring Boot.
- Implemented DAL (Data Access Layer) for MongoDB integration.
- Wrote unit and integration tests, ensuring code reliability and reducing production bugs.

Network and Threat Support Specialist — Bynet Data Communications   Oct 2020 - Nov 2022

- Detected and resolved network issues—from router misconfigurations to protocol failures (BGP, OSPF).
- Configured LAN/WAN networks on Cisco routers/switches and FortiGate/CheckPoint firewalls.
